

INTERIOR DOORS

2019

Dear Partners and Clients,

I would like to express my gratitude for Your trust and loyalty to Erkado brand. Also, I am proud to realise the fact You greatly enjoy our offer.

It is exactly thanks to Your strong feedback, knowledge of the market and involvement that together we can navigate the trends when it comes to the production of interior and exterior doors. Your support is a priceless asset to us and I want to thank again. With every edition of the catalogue we discover and become more aware of the fact that the functionality of doors is only of the aspects. There is more to it and I can say it is the design and innovative solutions.

It is of utmost importance to have Your trust, to share responsible work policy and cooperate in loyal terms.

For more than forty years we have managed the company in an ambitious and flexible way. The result is a strong, dynamic growth that motivates us to take up daring investments. One of them is to expand the production area by 20 000 m² (45 000 m² currently existing) till the end of 2019.

All this happens thanks to You and for You that is why, I feel honest pleasure to present to You the newest edition of the catalogue - effect of joint passion to doors.

Yours sincerely,

Zbigniew Kozłowski

HERSE SET

ENTRANCE DOOR LEAF WITH ANTI-BURGLARY LOCKS

Presented model: HERSE SET in WALNUT FINISH decor with ESSEN door knob

GENERAL INFORMATION

- HERSE SET door leaf is used in the housing and public utility as the entrance door (excluding door leaf 80N).
- HERSE door leaf together with the fixed frame, stainless steel or hard wood (not painted) threshold or an automatic seal has the insulating power of $R_w = 32\text{dB}$.
- HERSE SET door leaf in GOLD and SILVER SETS are already assembled as one piece and together with installed threshold whereas in GOLD SET there are holes for door knob and upper lock face assembly ready.

CONSTRUCTION

- MDF rails covered with two HDF boards
- filling with dedicated solid board
- enforcement with massive iron profile
- thickness 46 mm
- additional gasket

FINISHING

- door leaf made in SOFT, STANDARD or SOFT PCV technology
- HDF board covered with FINISH foil, CPL, PREMIUM, GREKO or PCV TWIN
- doors can be cut up to 8 cm by Erkado
- possibility to select only lower latch lock

HARDWARE

- three silver hinges $\varnothing 16$ with 3D regulation
- two three-bolt anti-burglary locks in class 2 for cylinder (price includes optional change of lower lock only)
- three anti burglary contact bolts on the hinge side

FIXED AND ADJUSTABLE REBATED HERSE DOOR FRAME

- possible application of electric strike in frame for lower lock [that excludes upper lock in a door leaf]
- main plate in frames is regulated

AVAILABLE DOOR WIDTHS

80	90	100	80N	available only in PCV decor and fixed or iron frame

LEDA EI30, EI60

INTERIOR FIRE PROTECTION ENTRANCE DOOR MADE IN HALSPAN TECHNOLOGY

Presented model: LEDA EI30 in WALNUT decor with STANDARD INOX door knob

GENERAL INFORMATION

The proper performance of the functions such as fire protection, intumescent and acoustic are provided only when assembling the whole set. The complete set includes: fire protection door leaf (pre-equipped with gaskets, locks, hinges, falling gasket) frame, overhead doorcloser and door lock cylinder and door handle all accordant to Polish Norm.

Acoustic isolation of HALSPAN door leaf together with falling gasket according to PN-B-02151-03:1999 is $R_w=32\text{dB}$

Leda door leaf is sold only in a set with leda door frame, wooden or steel

CONSTRUCTION

- dedicated HALSPAN filling respectively 44 mm thick for type EI30 and 54 mm for type EI60
- total thickness of door leaf respectively 50 mm for EI30 and 60 mm for EI60
- conifer frame
- fire resistant and intumescent expanding seal
- automatic door seal

FINISHING

- door leaf edge made in STANDARD technology

HARDWARE

- three hinges, $\varnothing 18$ regulated in three planes
- door lock cylinder
- door closer (add. charged)

FRAMES

- wooden fire protection fixed frame
- fire resistant seal
- electric strike or strike plate with regulation
- metal adjustable square frame of large size or welded and painted in RAL 9010, 9016, 8003, 8017, 7016, 7047, 1001

ADDITIONAL CHARGES

fire resistant door closer.

DOUBLE DOORS

FRAME CORNER CONNECTION

PROPER SELECTION OF CYLINDER

Exemplary calculation of the proper size of cylinder for board and stile door leaves (40 mm) with the thickness of face $G = 7$ mm

$$A/B = (C+G+3) / (D+G+3)$$

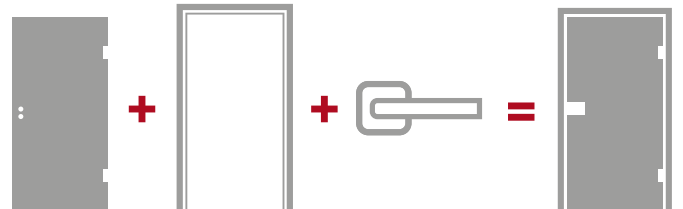

$$A/B = (15+7+3) / (25+7+3)$$

$$A/B = 25/35$$

Door type	Door leaf thickness	Lock proportions (c/d)	Recommended cylinder size (a/b)*
board, stile (rebated)	40 mm	15/25	26/36
board, stile (non-rebated)	40 mm	20/20	30/30
HERSE	46 mm	15/31	30/45
LEDA EI 30	50 mm	19/31	30/40
LEDA EI 60	60 mm	19/41	30/50

* Recommended cylinder size for the lock plate 7 mm thick and distance 2-4 mm

TYPES OF DECORS

FINISH

Finish material is re-impregnated foil, is printed and protected with the lacquer and coatings of desired parameters. The application of improved finishing layers results in the increase of better surface

GREKO

Pre-impregnated foil, is printed and protected with the lacquer and coatings of desired parameters. The application of improved finishing layers results in the increase of better surface resistance and flexibility of the product itself. The presence of silicone makes the foils much more resistant to water.

GREKO decor is manufactured on the basis of Japanese base coat of high density. The base is not resined. Thanks to lack of varnish, the foil becomes ecological and is safe for the health and the environment, not only during the production process but also during exploitation and recycling. The foil does not contain formaldehyde and the harmful substances.

What makes GREKO foil so unique is the unusual, stunning design. High quality of the surface goes together with the 3D effect of natural wood. These decors bring to mind the natural structure of wood

PREMIUM

The product on the basis of polypropylene (PP) i.e. the material of high resistance to scratches and friction, providing equally great visual values. This material gives a door leaf noble looks and ensures an individual profile. At the same, it faithfully reflects the structure of natural wood.

The PREMIUM material convinces both with its design and functionality. It is equally resistant to friction, fire resistant and durable.

All products from PREMIUM line guarantee long-term usage including even hard exploitation conditions without any inconveniences..

CPL

CPL laminate is composed of decorative layer impregnated in resin and the base layer providing flexibility. After laminating process, upper surface (resin) becomes hardened and it results in being impressively strong and resistant to friction and scratches. Also, it is characterized by high intolerance to high temperature and UV radiation.

Applying CPL laminate allows to exploit doors in so called tough spaces [being exposed to extreme conditions, humidity and over regular exploitation. The laminate is 0,15 mm thick.

TYPES OF EDGE FINISHING

SOFT EDGE

A door leaf made with soft edge finishing is free of sharp edges and that makes it look aesthetic and modern. The applied decors are more resistant to scratches and this improves general condition of the door leaf and its exploitation.

The foils applied to SOFT edge is connected in two spots shown in the picture below (not applicable for the bright white greko decor as the foil is connected on the rebate).

STANDARD EDGE

The flat surface is covered with CPL ST 0,15 mm thick, polypropylene PREMIUM foil or GREKO FINISH foil.

A door leaf with this type of edge finishing is of straight edge. The surface material joins with the rebate material on the very edge of the rebate. This is illustrated by the picture below. The exact manner of joining the material is applied to non-rebated door leaves, in general, and for sliding systems..

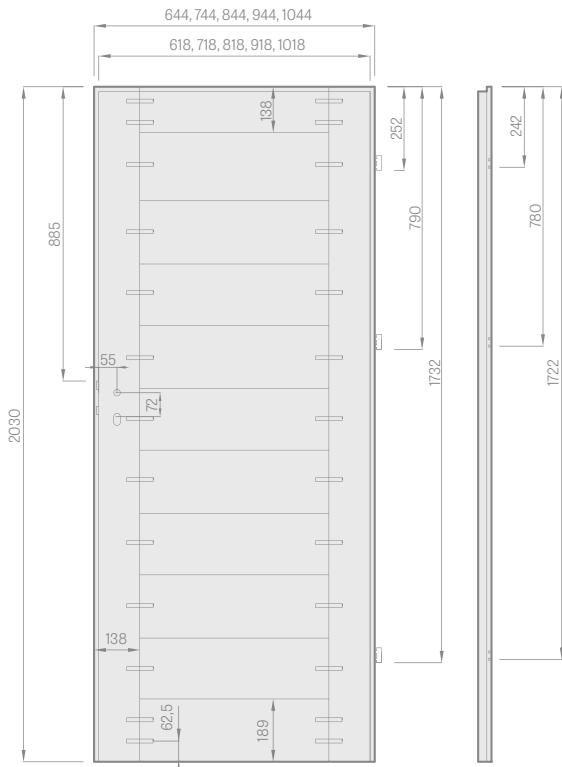

SOFT PCV FINISHING

SOFT PCV is based on high pressure application of the PCV material 0.7 mm thick on the flat or milled surface, together with the rebate. The joining of the material is in the invisible place. PCV material applied on the door leaf results in creating a unique and hard surface resistant to scratches, extreme temperature, humidity and detergents.

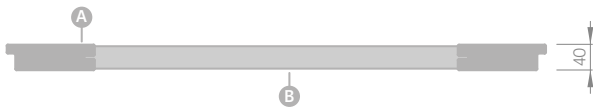

SOFT PCV technology is used in production of interior entrance doors from HERSE collection.

STILE DOOR LEAF

rebated door leaf

- A** MDF or wooden rails in PREMIUM decors
- B** MDF bars

Solid rail 22 mm thick

Esthetic profiled non-rail glazing

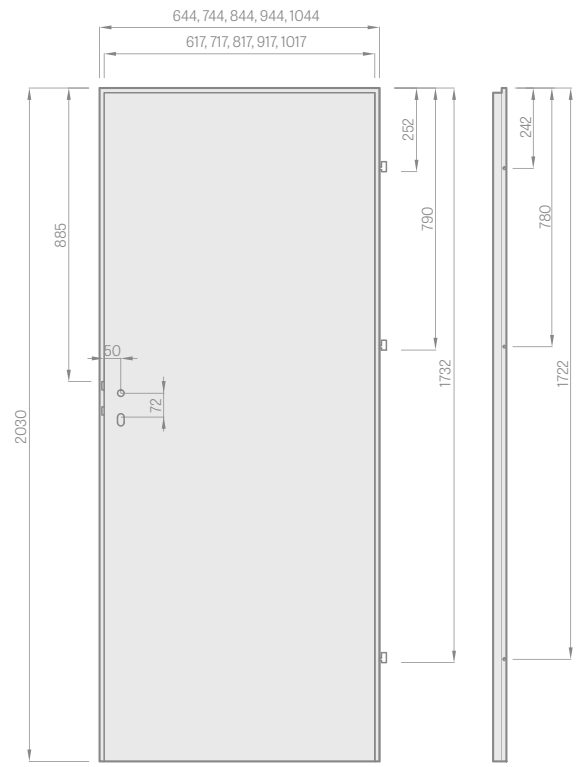

MDF rail for GREKO foils

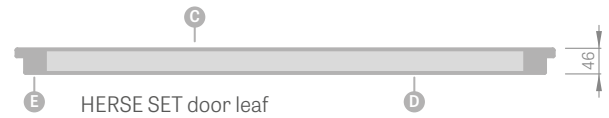

Wooden rail for PREMIUM and CPL foil
- core made of layer plywood

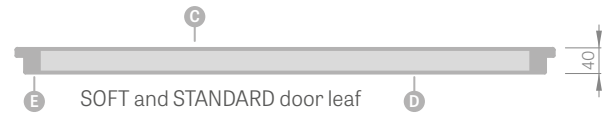

BOARD DOOR LEAF

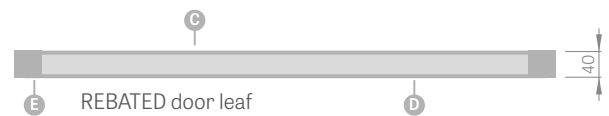

rebated door leaf

HERSE SET door leaf

SOFT and STANDARD door leaf

REBATED door leaf

- A** MDF board; **C** HDF board; **D** filling;
- E** MDF or wooden rails for HERSE SET and UNO PREMIUM

TYPES OF FILLINGS

honeycomb core

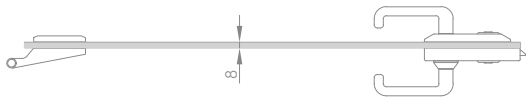

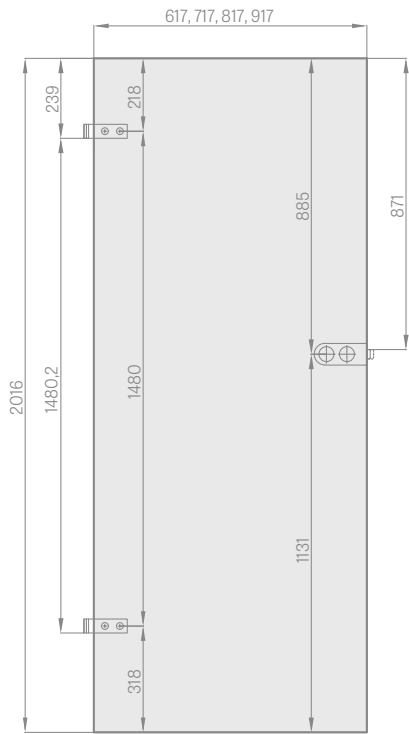

full plate board

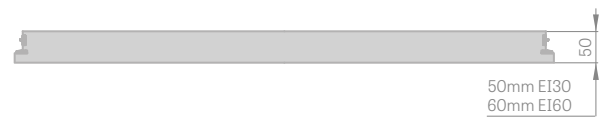

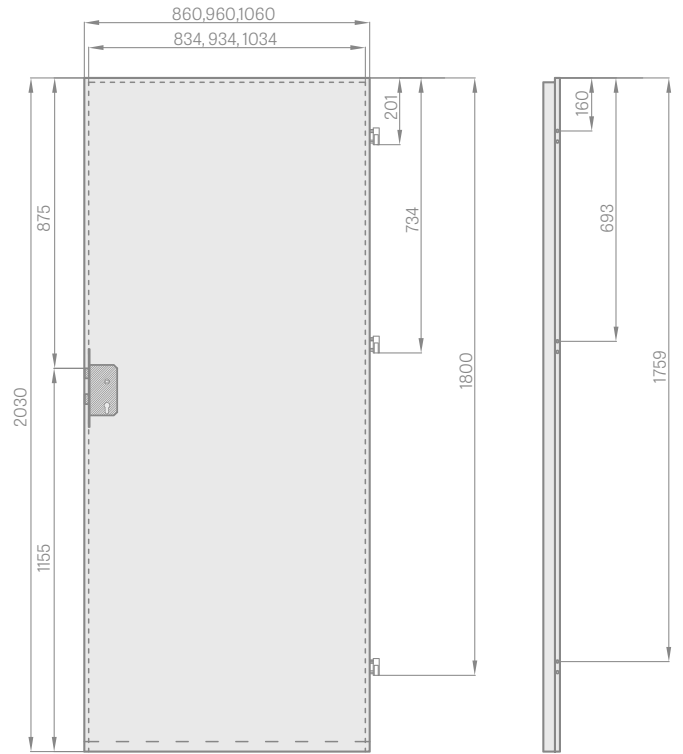

Honeycomb core and full plate board fillings come only with board doors.
Erkado applies mandatorily third hinge with full plate board.

GRAF GLASS PANEL

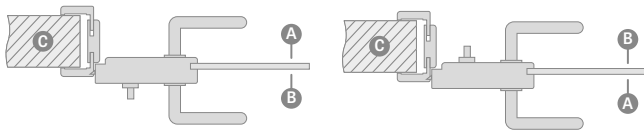

LEDA DOOR LEAF

BATHROOM LOCK

exterior side (Z)

interior side (W)

A hall; B bathroom; C wall

Bathroom lock – when ordering bathroom lock, the following should be selected:

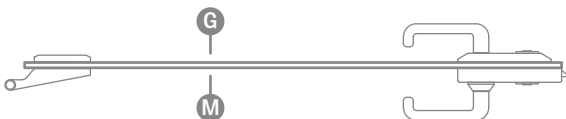

exterior lock – when blocking is to be fixed on the exterior side of the door (Z)

or

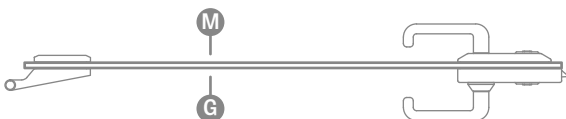

interior lock – when blocking is to be fixed on the interior side of the door (W).

Attention: bathroom locks are either left or right

STANDARD GLAZING OBVERSE

GLAZING ON DEMAND REVERSE:

G smooth side; M matt decorated side

Dedicated HALSPAN filling
44 mm [EI30] /
54 mm [EI60]

Fire resistant and
intumescent expanding seal

Automatic door seal

Three practical hinges with
3D regulation

Fixed frame

METAL HINGE CASINGS

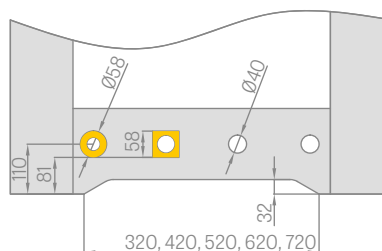

brushed nickel, patina, chrome polysk, brass gloss, white matt i black matt

Casing dimensions:

- internal diameter 16 mm for HERSE SET
- internal diameter 15 mm for board and STILE doors.
- length 47 mm

Ventilation cut and ventilation sleeves

Ventilation cut is not available for non-rebated door leaves to on-wall and in-wall sliding systems.

VENTILATION

Plastic ventilation sleeves for FINISH decors

Plastic woodgrain ventilation sleeves to STILE doors in GREKO, PREMIUM and CPL decors

Square and round metal ventilation sleeves

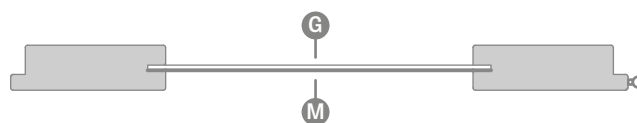

Ventilation grills

TRIMMING DOOR LEAFS

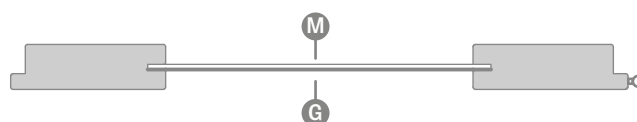

It is possible to trim the door leaf in Polish Norm, individually, up to max 50 mm or 80 mm in HERSE SET doors (if not already trimmed in the factory) or in board doors leaves only if an additional bottom bar was fixed.

(ATTENTION: the following must not be trimmed: FRAGI, double doors, LEDA, non-rebated door leaves to sliding systems, GRAF glass doors and any STILE door leaf in Czech Norm.

GLAZING IN STANDARD - OBLVERSE

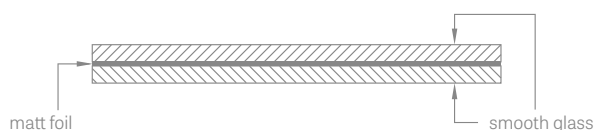

GLAZING ON DEMAND - REVERSE

G smooth side; M matt decorated side

GLUED GLASS VSG 221, 331, 441 MILK GLASS

to STILE door leaves

CLEANING KIT FOR REGENERATING AND MAINTAINING DOOR SURFACES BY OTTIMO

2 x 250 ml

ELECTRIC STRIKE

(available for fixed and adjustable frame to rebated door leaves, however not available for the GRAF glass frames)

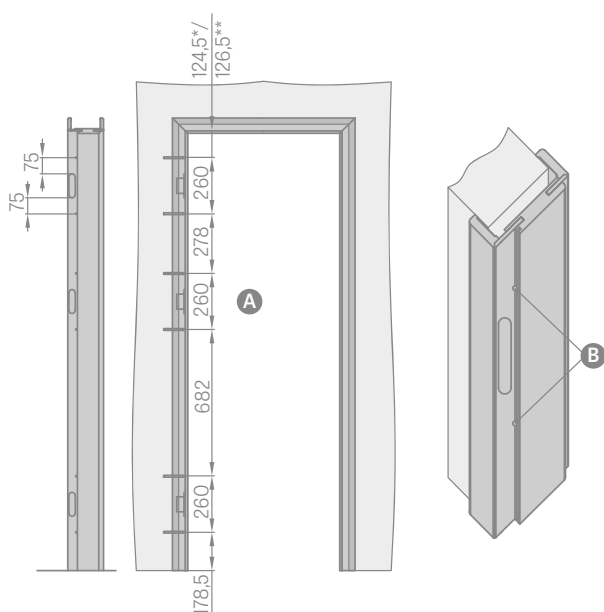

Types of electric strikes:

- basic 12 V
- basic 24 V
- with switch-off 12 V
- with switch-off 24 V
- reverse 12 V
- reverse 24 V

BASIC WITH THE SWITCH - closed all the time, opens when voltage is on
- works as the basic one but has possibility to be switched off

REVERSE - supplying voltage causes closing, lack of voltage opening

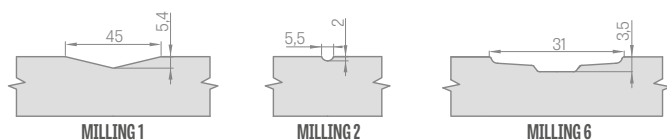

FIXING FRAME TO NON-REBATED DOOR LEAFS

*Adj. cover list 6 cm / **Adj. cover list 8 cm

- A** Drill holes for metal screws min. 80 mm long x \varnothing 6 mm
- B** At assembly of frame, it is required to use mounting anchors together with mounting foam. The seal should cover the holes drilled underneath

SLIDING SYSTEM

ON-WALL

ON-WALL SLIDING SYSTEM:

SINGLE SP1Nz (with hook)	
SINGLE SP1Nb (without hook)	
DOUBLE SP2N	

Available configurations of on-wall sliding systems:

- aluminium rail with masking trim and borderer (only SP1Nz and SP1Nb)
- aluminium rail with masking trim and tunnel frame (only SP2N)
- aluminium rail with borderer and tunnel frame (only SP1Nz and SP1Nb)
- aluminium rail with masking trim and with borderer and tunnel frame (only SP1Nz and SP1Nb)

It is not possible to have ventilation cut in non-rebated door leaves to in-wall sliding system.

ADDITIONAL CHARGES

adjustable tunnel frame in the price of adjustable frame

hook lock with hardware
only to single system

oval holder or round holder in the following colours: chrome gloss, brushed chrome, brass gloss; a set of holders consists of two pieces

synch system

system that allows for opening and closing two non-rebate door leaves equally at the same time by using only one door leaf.
only to SP2N

door-closer

automatic system of closing the door leaf in its ending phase.
available only to SP1Nz and SP1Nb

ROUND AND OVAL METAL HOLDERS

chrome gloss, brushed chrome, brass gloss, black matt

HOOK LOCK FOR KEY

chrome gloss,
brushed chrome,
brass gloss
black matt

Key comes only in
silver colour

Hook lock set includes two silver
holders

Basic wall mounting ZN2 on both sides

DOUBLE DOORS

REBATED, NON-REBATED

PRACTICAL INFORMATION:

DOUBLE DOORS

- Double doors have wood-based filling, additionally charged.
- DOUBLE DOORS are combined on the basis of available single door leaves in board and STILE technology and with corresponding features: decor, finishing (STANDARD, SOFT), glazing, etc.
- Passive door leaf is equipped with sash stops with door latch
- Passive door leaf below width 60 comes only as the full plain leaf – so called 'side leaf' (see the picture below)
- Side door leaves are made in board technology STANDARD edge and are available with honeycomb core filling or solid board (add. charged). Side door leaves are of vertical grain.
- Working and passive door leaves are equipped with door sashes
- Double doors in non-rebated technologies are available only with magnetic lock
- Non-rebated double doors come only with adjustable frame

AVAILABLE DOOR WIDTHS:

- board and stile double doors from 120 to 190 wide with the configuration of plain side leaf

60 + 30*	70 + 30*	80 + 30*	90 + 30*	100 + 30*
60 + 40*	70 + 40*	80 + 40*	90 + 40*	100 + 40*
60 + 50*	70 + 50*	80 + 50*	90 + 50*	100 + 50*

- * Side door leaf ('side leaf') is available only in STANDARD technology as full plain
- ** up to '180' for non-rebated door leaves

PRICE OF DOUBLE DOORS:

- Board and STILE doors: working door leaf **60 70 80 90 100** + passive door leaf **60 70 80 90***

Price of double door leaf with the sash = door leaf price x 2 + door sashes

- Board and STILE doors: working door leaf **60 70 80 90 100** + passive plain side leafs **30 40 50**

Price of double door leaf with 'side leaf' and the sash = door leaf price + side leaf with door sashes

- The price of double door fixed or adjustable frame + 30%

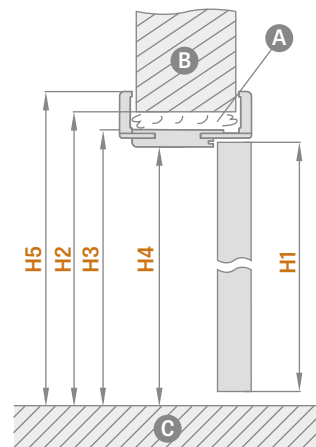

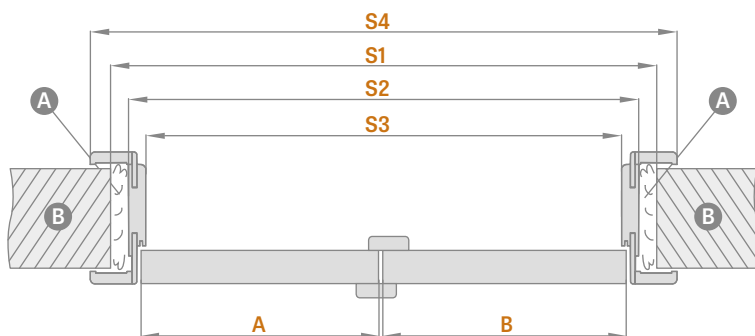

* does not concern non-rebated door leaves

DOOR FRAMES

- Rebated adjustable and fixed frames can be applied to all kind of interior doors by ERKADO made in board STANDARD and SOFT technology as well as in STILE technology.
- Non-rebated adjustable frame can be applied to interior doors made in board technology as well as STILE technology. These frames include three hidden hinges.
- Frames are made of high quality MDF and are covered with durable woodgrain foil or covered with UV paint.
- Depending on technology, the frames are covered with the following types of finishing: FINISH, GREKO, CPL, PREMIUM, PCV and UV paint.
- Frames to STILE doors have default third hinge.
- Each set of frame includes: separate elements of frame, hinges, screws. Particular elements have necessary drillings in the connection spots.
- Each set includes assembly instruction and guarantee card.
- Fixed frame to Herse collection is square and has wooden core.

ADJUSTABLE TUNNEL FRAMES

REBATED, NON-REBATED

DOOR FRAMES TUNEL

Tunnel frame is an adjustable frame or fixed frame without any hardware. It is constructed with one horizontal and two vertical beams. It can be applied to decorate in-door spaces as the element of protection to wall edges.

Nevertheless more often it is used for the esthetical reasons as the decoration of the whole interior.

Rebated and non-rebated adjustable and fixed tunnel frames are also used in ERKADO sliding systems.

Non-rebated adjustable tunnel frames are not used in sliding systems.

Depending on the system we differentiate:

TUNEL DO SP1N	Tunnel frame to single on-wall sliding system
TUNEL DO SP2N	Tunnel frame to double on-wall sliding system
TUNEL DO SP1C.100	Tunnel frame to single in-wall sliding system to PANEL 100 wide
TUNEL DO SP2C.100	Tunnel frame to double in-wall sliding system to PANEL 100 wide
TUNEL DO SP1C.125	Tunnel frame to single in-wall sliding system to PANEL 125 wide
TUNEL DO SP2C.125	Double in-wall sliding system to PANEL 125 wide
mounting ZN1	Wall mounting on one side to single door leaf systems SP1C.100 and SP1C.125
mounting ZN2	Wall mounting on one side to double door leaf systems SP2C.100 and SP2C.125

„100”	1044	1024	1018	964	992	998	1137

F – minimal dimension of clear steel frame width on which we install frame casing. This dimension can be bigger than recommended by max. 20 mm. With bigger clear width one should pay attention whether the trims can properly cover the walls.

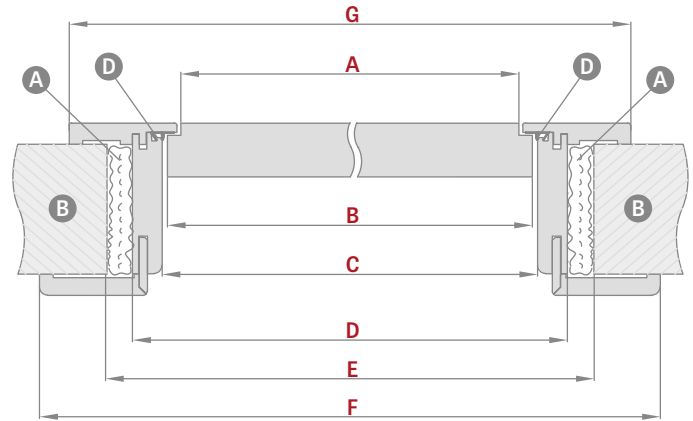

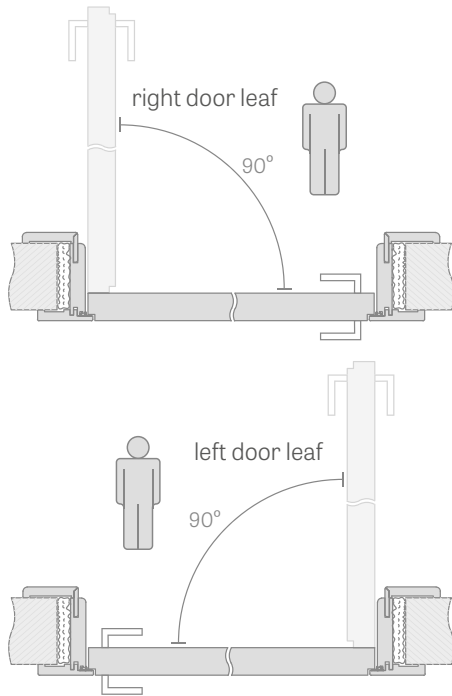

- A** – steel frame
- B** – wall
- C** – floor
- D** – knob
- E** – aluminium profile with gasket
- Z** – zakres od 80 mm do 255 mm

- Square with extended feather - not available
- Prices of tunnel frames of widths: 60, 70, 80, 90, 100 are at prices of casing frames
- Tunnel has the same dimensions as casing frame (there are no drills for hinge and lock plate however it is equipped with the seal)
